

CAUSES OF RETIFORM PURPURA				
Thrombus	Protein Occlusion	Embolus	Vessel Wall Damage	Other
Disseminated intravascular coagulopathy (DIC)	Cryoglobulinemia type I	Cholesterol embolus	Medium-sized vessel vasculitis	Levamisole induced vasculitis
Meningococemia	Cryofibrinogenemia	Septic embolus	Calciphylaxis	Pyoderma gangrenosum
Antiphospholipid antibody syndrome	Paraproteinemia	Atrial myxoma	Primary hyperoxaluria	
Thrombotic thrombocytopenic purpura		Libman-Sachs endocarditis	Rheumatoid arthritis or systemic lupus erythematosus-related	
Warfarin-induced necrosis			Polyarteritis nodosa	
Heparin-induced necrosis			Cryoglobulinemia type 2 and 3	
			Opportunistic infection
