

COME READ MY LATEST
BOOK ABOUT RATS ON A
FARM

Read (aka REED) syndrome

Leiomyomatosis (uterine and
cutaneous)

RCC (type II papillary renal cell
carcinoma)

Fumarate hydratase (autosomal
dominant mutation)

THIS MNEMONIC REFERS TO REED SYNDROME, INCLUDING ITS ASSOCIATED MUTATION AND CLINICAL MANIFESTATIONS. REED SYNDROME IS CHARACTERIZED BY AN AUTOSOMAL DOMINANT MUTATION IN FUMARATE HYDRATASE. ITS CLINICAL MANIFESTATIONS INCLUDE CUTANEOUS AND UTERINE LEIOMYOMATOSIS AS WELL AS TYPE II PAPILLARY RENAL CELL CARCINOMA.
