

# MNEMONIC MONDAY

"GIMME TO YOUR LEDER"

GIEMSA

TOLUIDINE BLUE

LEDER

# Derm In-Review

THIS MNEMONIC REFERS TO STAINS FOR MAST CELLS. REMEMBER "RUB ME AND TAKE ME TO YOUR LEDER" AS A MNEMONIC TO REMEMBER THAT LEDER STAIN STILL WORKS AFTER DARIER'S SIGN IS INDUCED (AFTER DE-GRANULATION OF MAST CELLS).

Side note: Not all stains are included here. Ex: tryptase and c-kit would also stain masts cells, but are less commonly used in clinical practice.
